ABSTRACT

This document presents Jefferson College's "Long Range Plan," which is intended to provide the College's governing board, administration, and faculty and staff with a task-oriented blueprint for maximizing the delivery of higher education services to students and the community in a predictable, programmatic, and fiscally sound manner. Jefferson College espouses the proposition that an institution that plans, implements, assesses, and documents its accomplishments also benefits through public, professional, and political recognition as an accredited institution providing high quality services. A system is in place to monitor the plan's activities, document progress, and make reasoned adjustments as needed. This written plan specifies the goals, objectives, strategies, performance measures, funding sources, persons responsible, and completion timelines. The College's strategic aims are: (1) solidify the reputation of Jefferson College as a premier community college in Missouri at the beginning of the 21st century; (2) maximize academic, vocational-technical, and personal outcomes for Jefferson College students; (3) facilitate and enhance the collegiate experience of all Jefferson College students; (4) enhance student learning and institutional effectiveness through the implementation and utilization of electronic managerial, educational, and telecommunications technologies; (5) provide educational facilities conducive to a positive teaching-learning environment; and (6) maintain a qualified, thriving, and productive institutional workforce. Background and Purposes

The purpose of planning is to provide the College's governing board, administration, and faculty and staff with a task-oriented blueprint for maximizing the delivery of higher education services to students and the community in a predictable, programmatic, and fiscally sound manner. Planning has always been an integral part of governance of the College's operations, but is becoming increasingly more widespread and formalized. The institution-wide planning process has been legitimized in a standing committee (the Program & Facilities Planning Committee) with linkages to the Board of Trustees, the Administrative Cabinet, the Constituent groups, and other standing committees. All employees continue to have the opportunity to participate in this planning process through subcommittee work and their respective constituent groups. The community is represented through a number of established advisory and ad hoc committees.

The need to self-assess the College's strengths and needs, the perceived external opportunities and constraints, and the projected activities, operations, and finances is widely recognized and accepted. The benefits that accrue from thoughtful planning include a shared sense of mission and expected accomplishments, enhanced accountability to constituents, prudent fiscal management, and superior learning for students. Jefferson College espouses the proposition that an institution that plans, implements, assesses, and documents its accomplishments also benefits through public, professional, and political recognition as an accredited institution providing high quality services.

Plan Management

A system is in place to monitor the plan's activities, document progress, and make reasoned adjustments as needed. The written plan specifies the goals, objectives, strategies, performance measures, funding sources, persons responsible, and completion timelines. A computerized database insures the tracking of all tasks, the monitoring of progress and milestone completion, the documenting of associated costs, and the reporting of intermediate and summary findings.

Written progress reports are generated quarterly, and the plan is reviewed quarterly first by the Program & Facilities Planning Committee and then by the Administrative Cabinet. This process allows administrative decision-makers the opportunity to modify or incorporate new plan components as needed. Furthermore, an annual assessment of all goals and objectives in the plan facilitates revisions with a focus on continual improvement.

Strategic Aim	Goal	Objective	Strategy	Performance Measure	Administrative Assignment	Unit Assigned	Person Responsible	Anticipated Completion
1.0	Solidify the reputation of Jefferson College as a premier community college in Missouri at the beginning of the 21st century.	1.1	Maintain maximum access to higher education.	1.1.1	Maintain reasonable costs to students through our tuition and fee structure.	1.1.1.1	Implement multi-year tuition and fee schedules taking into account local and economic conditions and institutional financial projections.
